Cashiering

Overview

As an integral part of the emGovPower Municipal applications family, the Centralized Cashiering interfaces with all billing modules to provide for recording of revenue collections. All pending invoices are available for a payee, permitting the collection of multi-jurisdictional amounts, even with a single payment. Cashiering is interfaced to a cash register for receipting, check validation, and cash drawer management.

Differentiating Functionality

- Interfaced to cash register
- ACH standard check validation
- Interfaced to all emGovPower billing applications
- Fast operation
- Unlimited user-defined Transaction types
- Security controlled operator actions

Business Benefits

- Single point of payment for all bills
- Improved collection since all pending invoices are shown for any payee
- Check validation and maintenance supports deposits and NSF handling
- Fast operation reduces customer queues
