Payroll

## *Overview*

Offering unlimited incomes, deductions, and leaves, the emGovPower Payroll module provides the flexibility to support the extensive needs in the modern municipality. Beginning with the distributed time entry, the computation of payroll for a variety of employee-types is easily performed, ultimately resulting in complete accounting transactions into General Ledger.

Differentiating Functionality

- Unlimited income, deductions and leave types
- Distributed time entry
- Time based parameters
- Flexible manual check processing
- Full W-2 processing
- Project and program time entry and accounting
- Profiles for employee setup
- Optional leave time expensed as accrued
- Direct deposit via ACH

Business Benefits

- Flexible incomes, deductions and leaves improve employee satisfaction
- Distributed time entry reduces paper shuffling and increases accuracy
- Interfaced to General Ledger, assuring proper accounting updates
- Complete check history supports queries and employee management
- Recomputation of leave accruals assures proper rates based on longevity
